

Project Name: Three Creeks Parkway Restoration Project

American Rivers Request for Proposals for LANDSCAPING MANAGEMENT SERVICES for Creek Restoration in Eastern Contra Costa County, California.

RFP and Project Description Materials available at <https://www.americanrivers.org/3cpproject/>

Project Description

Through this Request for Proposal (RFP), American Rivers seeks Proposals from qualified licensed contractors to serve as Resident Project Manager to provide on-site management of the planting, irrigation and weed control for the Three Creeks Parkway Restoration Project (Project) at Marsh Creek in Brentwood, California starting in December 2020 and running through December 2021. A landscaping firm has been selected to execute the Project. This RFP is for the management and oversight of the landscape contractor. The most qualified Applicant will be selected based on the Scoring Criteria provided in the RFP. The Proposal budget of the selected Applicant will be applied beginning in December 2020; the proposed budget must remain valid through the end of the contract period in December 2021. However, American Rivers reserves the right to negotiate a final contract amount with the selected Applicant in order to best meet the needs of the Project.

The creek restoration Project is designed to provide multiple benefits, including improved water quality in Marsh Creek and the Sacramento-San Joaquin Delta, habitat for a diversity of avian, fish, reptile and mammalian species, and recreational opportunities for the growing community of the City of Brentwood. These improvements will be realized by widening 4,000 linear feet of the Marsh Creek flood control channel, creating a floodplain along the low flow channel, and removing non-native and restoring native riparian and upland vegetation in a 13.5-acre Project Site. The Project will also bring much needed shade to the Marsh Creek Regional Trail, as well as a pedestrian undercrossing below Central Avenue to reduce traffic congestion and improve safety. Civil construction will be completed by December 2020 and Landscaping work begins after Civil channel and floodplain reshaping work is complete. The Project is located within the City of Brentwood, approximately 5.7 miles upstream of the creek's outlet to Big Break in the Sacramento – San Joaquin Delta and roughly halfway between the Delta and the base of the creek's headwaters on the eastern flanks of Mount Diablo.

PROPOSALS are due by 5:00 pm (PDT), Tuesday, October 27, 2020, sent via email to 3Creeks@americanrivers.org.
